

Joins to the round group of letters

These joins work best with oval slanting writing. With fat letters the join has to go over the top and back. Try the examples below to see what happens. A penlift may be better than an awkward join.

cacaca
no uucle

Fat letters, uneconomic joins.

ad ag ad
dag gad add

Narrow letters, more efficient joins.

adadad
how pool

Round letters, looped joins.

hwa lcl had
had world

Good solution to a bad join.

chchch
church

Keep your 'c's round.

eel eye
ed lge

Some letters are better left unjoined.

see servant glasses as fish is

Do not pull 's' out of shape. Simplify it or do not join at all.
