

Large writing and small writing

The size of your writing is a personal matter but there are limits. Small writing must be clear and well spaced or it will be hard to read. Tiny writing can be a sign of tension. Relax and it gets larger. Over-large writing gets muddled as the lines mesh together.

*It was most pleasant to stay for
dinner. I did enjoy meeting and
talking with your family— not that
I was able to as much as I'd have liked*

island made up of rock formed

Small letters must be clear and well spaced.

*do nothing
busy then a
of without
man. then
me up took her
his wound*

Try to control the size of your letters so there is space between the lines of writing.

*Todayland at Vienna, was unbroken usually
in passing the final decisions in their arms
by to get least of all the stakes that strike in
no where spirit's justice line*

Complex or careless writing is illegible when small.

*hours away heard
one in preparation for
late week Winston's
flies up and at even
poster of Big Brother is*

Many of these letters are wrongly formed. Making them larger does not make them any more legible.
